

M.E.A.D. TAC SHOOTER - CANADA

Duration: 3 days

Cost \$1499.00

Schedule: This course is 3 days and is scheduled based on requirements:

Modular Equipment Applications Development, (MEAD): The CORE of this course is to help you choose and use proper tactical equipment and gear, as well as to understand the design of specific pieces of equipment. Understanding equipment design will teach you how to utilize it to maximize your firearm training and development. Based on extensive research of lessons learned events, the course provides the student with hands on training to manage these situations. We prepare you for the reality that you and your gear may be the difference between life and death.

We also cover tactical medicine, equipment needed, defensive tactics with gear, urban CQB, utilizing dynamic interactive drills and scenario-based training. With regards to Tac-Med, we focus on life threatening injuries that require fast medical intervention. We provide the knowledge, skills and confidence so you can deliver medical care in any combat / natural disaster situation. We emphasize hands-on sessions and realistic scenarios.
